CRISTYL JOY E. SACATANI

Bagu, Pamplona Cagayan | github.com/cristylsacatani-cell
09453962546 | cristylsacatani6@gmail.com

OBJECTIVES

I'm a Computer Engineering student passionate about building innovative digital solutions at the intersection of software and hardware. Thrives on tackling complex technical challenges, developing functional applications, and turning every project into a learning opportunity. Motivated to contribute to impactful projects while continuously sharpening core technical capabilities.

EDUCATION

Cagayan State University - Carig Campus **2023 - Present**
Bachelor of Science in Computer Engineering

- Relevant Courses: Data Structures & Algorithms, Circuit Analysis, Web Development, Logic Circuits, Hardware-software integration, Digital systems design, Machine Learning, Computer Networks.

Pamplona National School of Fisheries **2021 - 2023**
Science, Technology, Engineering and Mathematics

- Focus: Advanced mathematics, physical sciences, and foundational technology concepts.

PROJECTS

- Custom Regulated Power Supply
- Custom PIC Development Board
- Illegel Parking Detector
- Computer Engineering Job Portal
- Arduino-Based Automated Ventilation System

CERTIFICATIONS AND SEMINARS

- Regional ITE Summit 2026: Building Smarter Futures through Technology and Engineering
- Frontiers of Computer Engineering: 2025 International Conference on New and Emerging Technologies
- International Conference on Engineering the Intelligent Future: ENVISION, CONSTRUCT, EMPOWER

SOFT SKILLS

- Communication skills
- Analytical and Critical Thinking
- Problem Solving
- Teamwork and Adoptability
- Flexibility

TECHNICAL SKILLS

Programming: C, C++, Python, Basic Java, HTML, CSS
Hardware and Electronics: PCB Design, Soldering, Circuit Design, 3D enclosure modeling
Embedded Systems: PIC, Arduino, ESP32, Raspberry Pi
AI and Computer Vision: Digital Image Processing, Object Detection

ADDITIONAL INFORMATION

- **Interest:** Circuit Analysis, Hardware Prototyping, Technology, Artificial Intelligence, System Development, Hardware-Cloud Integration, Real-Time Operating Systems
